

I'm not robot!

World War I was an international historical event. Many battles were fought all over the world with enrolled volunteers and soldiers. The causes of the war, the devastating statistics and the interesting facts are still studied today in classrooms, history and museums books. The beginning and end of the war of the beginning of the war began with the assassination of the Archduke Francesco Ferdinando of Austria. He was heir to the throne, but was assassinated by a Serbian nationalist. The war broke out a month later, when Austria-Hungary declared war on Serbia. The war began on July 28, 1914, lasting four years, three months and fourteen days. The fighting ended on 11 November 1918. It would take another six months before the war officially ended up with a peace treaty negotiated five years after the assassination of the archduke. The war was called several names. World war are often abbreviated as WWI in writing. In conversation and writing, reference is made to several other names. It can be indicated as the Great War, the World War, the war of the national teams and the end war all the wars. The victims and wounds during the four years of combat, 65 million soldiers fought in the battles. Eight million soldiers were killed all over the world. Another 21 million were injured and seven million were mutilated by missing limbs. The United States only participated in the war for seven months, but had discouraged the statistics for the victims and wounds. During that period of seven months, 117,000 soldiers died and 204,000 were injured. Chemical weapons were used for the first time in the First World War. The planes were used to fight in the war with 70 different types used by all nations. The planes allowed the explosives to fall to the ground. A machine gun could shoot 600 shots per minute, was considered the equivalent fire of more than 150 rifles. medical rites and advances the states and medical advances were benefit benefit of the war. Blood banks were first used during the war for necessary transfusions. The blood was stored on ice for up to 28 days. Plastic surgery was invented following World War I. A surgeon started the surgeries to help shrapnel victims with extreme facial injuries. Many techniques spearheaded the way for facial reconstructive surgery.
