CCO/ davidpheat/Pixabay According to the data collected by the AAA, the average motorist pays 60.8 cents per mile, or \$9,122 dollars per year, when buying a new car. Small sedan, SUVs, hybrids and electric vehicles are the cheapest to operate while pick-up trucks cost much more per mile than any other car at a combined annual cost of \$10,054. The operating costs of new cars do not have to take into account repairs or wear because new cars usually do not need replacement tyres or expensive service. You have the luxury of being the only person who damages the car when it is new. Older cars could have been mistreated by drivers who have not made basic maintenance. Replacement Service Manuals The best price for anything is zero but when it comes to information can you be sure that the type of information available for free is worth using? You don't want to use the wrong or coolant oil because some good fool gave you the wrong information online, do you? Fortunately, you will find copies of online service manuals through sites like Amazon, but they will not be free. Whether you buy the owner's full manual, service book or get the service manual as a DVD, you will have to pay for it and wait for it to be sent to you. A PDF of a service manual is one of the best ways to get a free service manual. You can see it on your laptop, your tablet or your smartphone so it's as portable as the paper book that came with the car. You can find additional tips and suggestions on the site where you download the manual and there may be a chatroom there too so you can ask the questions you are required to come with when you start your repairs.
